

PHOTO GUIDE

Where do I start? This again is a personal choice but I can give you tips and guidelines. Keep it simple... Natural colours like beige, cream, grey and white work well. The camera loves the colour combinations in the colour palette. You can add accents of colour to these combinations in the form of accessories like scarves, necklaces etc. Denim never goes out of style, we love denim! White/ black shirts and denim are however soooooo last year so lets add some colour.

Lets steer away from bold patterns and logos. Jackets work well as they are easy to take on and off for different looks.
